Manual

Result Analysis Software I
(Grade 9, 10)

Prepared by Fekadu Wolde
January 2025

Addis Ababa

Preface

This manual is designed to serve as a comprehensive guide for understanding and utilizing Result Analysis Software, a solution tailored to streamline academic activities and enhance data management processes for grade 9 and 10. The software has been developed with a focus on simplicity, efficiency and the specific need of secondary school. Some of the crucial contents included and described in the manual are; user guide, inputting data, generating reports, troubleshooting common issues and abbreviations.

This manual will provide users with step-by-step instruction navigating the features and functionalities of the software. It includes explanation and descriptive screenshot images to ensure an easy user experience.

The development of this software stems from the desire to address common challenges in academic workflow, such as automating students result, generating statistics and simplifying data visualization.

I recommend that users start by familiarizing themselves with the terms and abbreviations section to input data appropriately and generate efficient report. I hope this manual and the software it accompanies will serve as a valuable tool in enhancing the efficiency and accuracy in academic result management.

Purpose

This Result Analysis Software I is designed specifically for grade 9 and 10 in government general secondary schools in Addis Ababa. It assists teachers and school administrators by automating student result processing and generating critical data and reports. The software provides features such as:

- Rosters for the first and second semesters.
- Student result report cards.
- Cumulative result analysis for the first and second semesters.
- Subject-wise result analysis for each semester.
- Top ten students for the first and second semesters.

By streamlining these tasks, the software enhances efficiency and accuracy in academic result management.

Introduction

The Result Analysis Software I is a tool designed for grade 9 and 10 of government general secondary schools to streamline the process of managing and analyzing student performance data. By automating result calculations and report generation, the software minimizes manual effort, enhances accuracy, and provides actionable insights for teachers and school administrators.

Objective

The primary objective of this software is to assist schools in efficiently managing academic results and generating essential data and reports. It aims to save time, reduce errors, and provide a comprehensive view of student performance across semesters and subjects.

Overview

This software offers the following key features:

- **Rosters**: Generate student rosters for the first and second semesters.
- **Result Reports**: Create detailed student result report cards.
- **Cumulative Analysis**: Analyze cumulative results for both the first and second semesters.
- **Subject Analysis**: Provide subject-wise performance analysis for each semester.
- **Top Performers**: Identify the top ten students for both semesters.

By leveraging these features, schools can gain deeper insights into academic performance, enabling informed decision-making and better support for student success.

Direction

Directions for Using the Software

This software is designed to help homeroom teachers or any responsible person manage student records effectively. Follow the steps below to use it:

Step 1: Fill the "**NAME**" Sheet

Enter the **Name**, **Gender, and Age** of students in the "**NAME**" sheet.

These details will automatically transfer to: ***Mark List, Sample Name, Semester I Roster, Semester II Roster*** and ***report CARD***.

Note: Ensure all required fields in the "**NAME**" sheet are completed accurately.

Step 2: Edit the "MENU1" Sheet

Use the "MENU1" sheet to update school information, including:

- Subjects
- Grade & Section
- Homeroom Teacher's Name
- Vice Director's Name
- School Name, Address, and Contact Details
- Academic Year and Telephone Number

These updates will reflect across:

- MLIST
- ROST1st
- ROST2nd
- CARD and other sheets.

Note: Ensure all edits in the "MENU1" sheet are accurate and complete.

Step 3: Fill the "MLIST" Sheet

Enter students' marks for each Subject in both:

- FIRST SEMESTER
- SECOND SEMESTER

And add data for Students Conduct and Absenteeism in the provided column.

Finally, the software will calculate and update:

- Total Marks
- Average Marks
- Rank

Note: Input student's marks carefully, as they directly affect the results across the "MLIST," "ROST1st," "ROST2nd," and report "CARD" sheets.

Step 4: Maintain the report "CARD" Sheet

The report "CARD" sheet is used to review individual student records.

Click the Roll Number on the right-hand side of the "Roll Number" column or click on the navigation button to navigate and to get the next student result in the report "Card" sheet.

This action displays the corresponding student's detailed record in the database.

Note: Ensure accurate data entry at every step to maintain consistency and integrity across all sheets.

Simple User Guide

Getting Started

Setting Up:

Ensure the software is properly configured for your school (e.g., grade boundaries, semester settings) and double check the type of the subject given for the corresponding grade. Enter the name of the homeroom teacher assigned for the given class according to the page requirement as illustrated by Fig 1.

If it's your first time using the software, follow the setup instructions in "MENU1" section.

For instance, here I've input the grade and section as "10G" and the first homeroom teacher name as "Fekadu Wolde" and the second semester homeroom teacher as "GEME". These data are seen in the screenshot below and displays in every parts of the section.

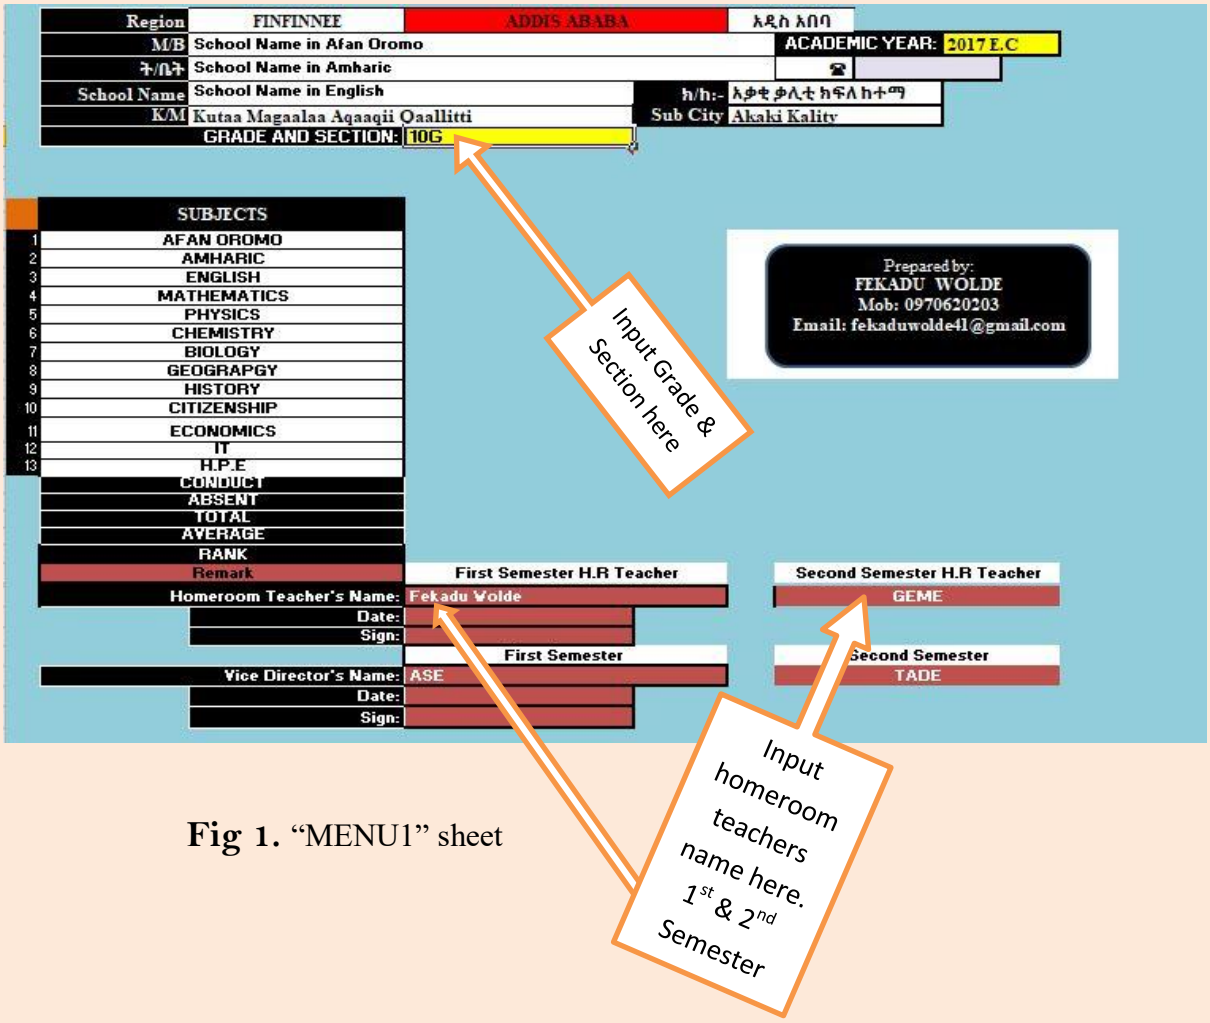

Fig 1. "MENU1" sheet

Inputting Data

The primary data inputs required are students' name, gender age and their subject results. Follow these steps:

Open the Name Section

Entering Students Name, Gender and Age:
Navigate to the top corner or the first roll number in the worksheet then enter Students' Name, Gender and Age in the space provided as shown by Fig 2.

In the "Name", "Gender" and "Age" columns, type the names, gender and age of all students in your class or grade level as shown in the figure below. Ensure correct spelling and avoid duplicate entries.

For example, the Name, Gender and Age of two sample students are filled in the "Name" sheet as seen by the screenshot below. The name of these students will automate by the software and displays in every parts the section.

Fig 2. "Name" sheet

The second data inputs required are students' subject result, students conduct and absenteeism. Follow these steps:

Open the Mark list (MLIST) Section

Enter Subject Results, Students' Conduct and Absenteeism for the first and second semester:

For each student, enter their results for each subject, students' conduct and absenteeism in the corresponding columns as shown by Fig 3.

For example, the names of the two sample students "Almaz Daba Haile" and "Bilisuma Hagos Lema' appeared in the mark list (MLIST) sheet. After completely input the results of each subject of the two students, we need to fill their conducts (in letter) and absents (in number) in the space provided, as of the screenshot displayed below.

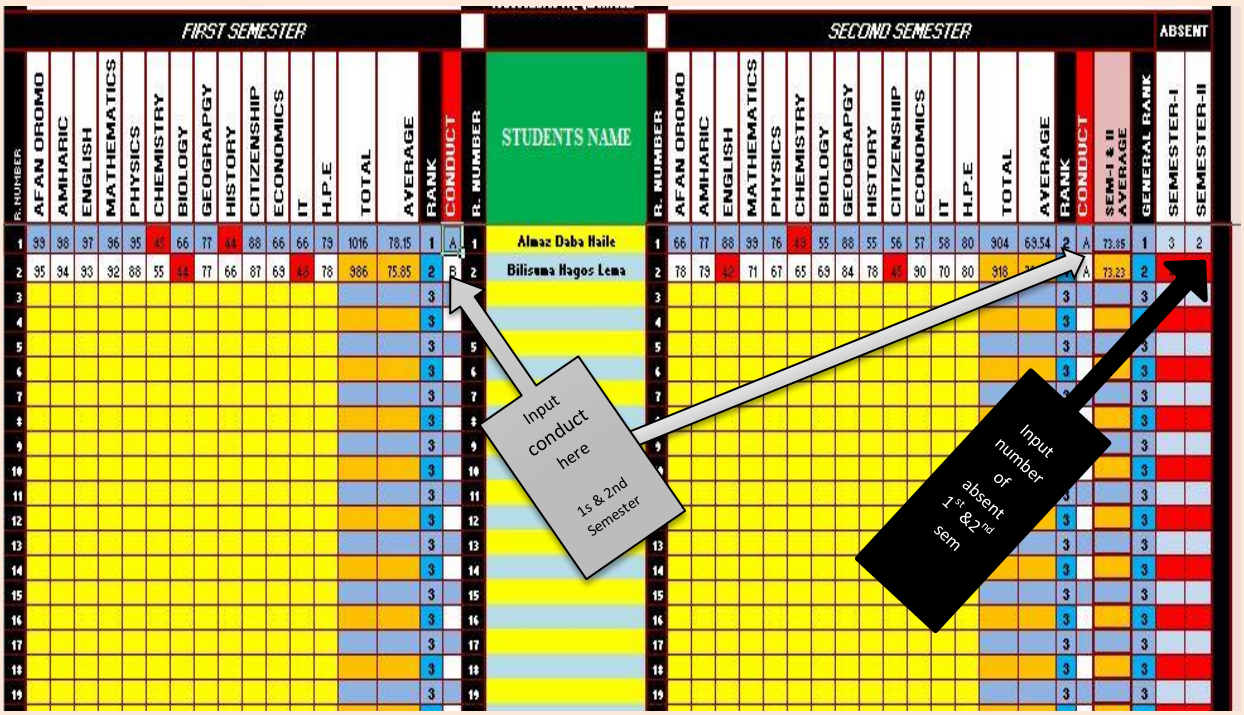

Fig 3. "MLIST" sheet

Use numerical values (e.g., 85 for a score out of 100) and leave blank if a result is not available.

Saving Data:

After entering all data, save your work to avoid data loss. Use the Save button or the standard save function in Excel.

Generating Reports

The software can generate various reports based on the entered data. After all the required data are carefully and correctly inputted, the homeroom teacher can easily access all the information used to report to the school management and record office. Here's the way how to access them.

Rosters for the First and Second Semester

Go to "ROST1st," sheets.

Review the first semester roster that contains students detail data. Each roster page contains five student with their first semester results of all the given subject and their conduct and absenteeism as shown in the Fig 4.

Here we can see the first semester roster that contains the results of each subject, conducts, absenteeism and other data of the two students for their first semester academic activities and performance. One can easily print this page and submit to the school record office.

Fig 4. "Rost1st" sheet

This sheet contains the students' first semester result of each subject, total mark, average mark, conduct, absenteeism and other information. It also contains homeroom teacher name. No data

input is required in this sheet it is resulted from the automation of the software. The homeroom teacher can easily access and print it to report for record office.

Go to "ROST2nd" sheets.

Review and access the first and second semester results and other data in "Rost2st" sheet that contain the students' complete information within the two semesters. This can be illustrated for two sample students taken, in Fig 5 below.

Here, after completely feeding the required data the second semester roster will display as of the screenshot given below. The sheet contains the students' first and second semester result of each subject, cumulative mark, cumulative average mark, conduct and other important information.

Fig 5. "Rost2nd" sheet

No data input is required in this sheet it is resulted from the automation of the software. The homeroom teacher can easily access and print it to report for record office.

Report Cards:

Go to the "Report Card" section.

Select a student from the dropdown menu or input their roll number or click on the navigation button found in the sheet to view their detailed report, as shown in Fig 6.

This section shows the report card of the first student (Almaz Daba Haile) academic activities and performances based on the data we provide to the software.

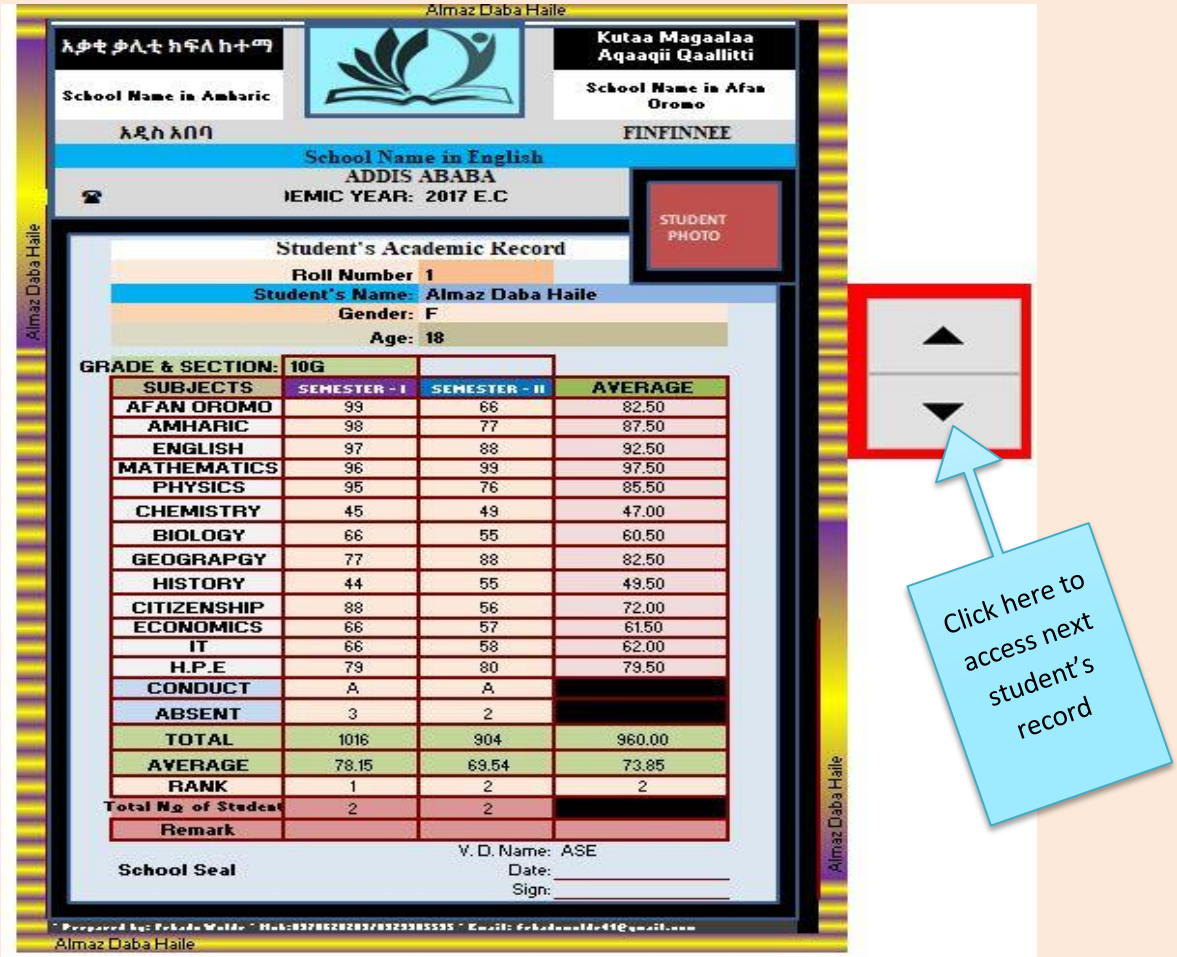

Fig 6. "CARD" sheet

We can go to the next student's report card by clicking the navigation button. We can also go back and forth simply by clicking the navigation buttons to view the student we want.

Result Analysis:

Open the "Analysis" section.

Select the semester (First or Second).

View the summary of student performance, including total scores and averages in the first and second semester.

Troubleshooting Common Issues

Here are some common issues you might encounter and how to resolve them:

Incorrect Data Entry:

Double-check the student names and results for accuracy. You can easily edit any data to correct mistakes.

Missing Results:

Ensure all required fields are filled correctly.

Abbreviations

The software uses abbreviations for certain terms and phrases to conserve space and enhance the readability of data displayed on the screen. The meanings of each abbreviation are illustrated below. In case you get stuck while working, you can refer to this section.

1. **Dirctn**: Directions
2. **MENU1**: Menu or Setting
3. **NAME**: Students Name
4. **MLIST**: Mark List
5. **ROST1st**: Semester I Roster
6. **ROST2nd**: Semester II Roster
7. **1st Analys**: 1st Semester Result Analysis
8. **2nd Analys**: 2nd Semester Result Analysis
9. **S.Name**: Sample Name
10. **datab**: Database

Thank you for using my software!!
