Manual

Result Analysis Software II
(Grade 11 and 12)

Remember: This manual is equally applicable to the software developed for both the "**Natural Science**" and "**Social Science**" streams.

Prepared by Fekadu Wolde
January 2025

Addis Ababa

Preface

This manual is designed to serve as a comprehensive guide for understanding and utilizing Result Analysis Software, a solution tailored to streamline academic activities and enhance data management processes. The software has been developed with a focus on simplicity, efficiency and the specific need of secondary school. Some of the crucial contents included and described in the manual are; user guide, inputting data, generating reports, troubleshooting common issues and abbreviations.

This manual will provide users with step-by-step instruction navigating the features and functionalities of the software. It includes explanation and descriptive screenshot images to ensure an easy user experience.

The development of this software stems from the desire to address common challenges in academic workflow, such as automating students result, generating statistics and simplifying data visualization.

I recommend that users start by familiarizing themselves with the terms and abbreviations section to input data appropriately and generate efficient report. I hope this manual and the software it accompanies will serve as a valuable tool in enhancing the efficiency and accuracy in academic result management.

Purpose

This Result Analysis Software II is designed specifically for grade 11 and 12 of government general secondary schools in Addis Ababa. It assists teachers and school administrators by automating student result processing and generating critical data and reports. The software provides features such as:

- Rosters for the first and second semesters.
- Student result report cards.
- Cumulative result analysis for the first and second semesters.
- Subject-wise result analysis for each semester.
- Top ten students for the first and second semesters.

By streamlining these tasks, the software enhances efficiency and accuracy in academic result management.

Introduction

The Result Analysis Software II is a tool designed for grade 11 and 12 general secondary schools to streamline the process of managing and analyzing student performance data. By automating result calculations and report generation, the software minimizes manual effort, enhances accuracy, and provides actionable insights for teachers and school administrators.

Objective

The primary objective of this software is to assist schools in efficiently managing academic results and generating essential data and reports. It aims to save time, reduce errors, and provide a comprehensive view of student performance across semesters and subjects.

Overview

This software offers the following key features:

- **Rosters**: Generate student rosters for the first and second semesters.
- **Result Reports**: Create detailed student result report cards.
- **Cumulative Analysis**: Analyze cumulative results for both the first and second semesters.
- **Subject Analysis**: Provide subject-wise performance analysis for each semester.
- **Top Performers**: Identify the top ten students for both semesters.

By leveraging these features, schools can gain deeper insights into academic performance, enabling informed decision-making and better support for student success.

Direction

Directions for Using the Software

This software is designed to help homeroom teachers or any responsible person manage student records effectively. Follow the steps below to use it:

Step 1: Fill the "**name**" Sheet

Enter the **Name**, **Gender, and Age** of students in the "**name**" sheet.

These details will automatically transfer to: ***Mark List, Sample Name, Semester I Roster, Semester II Roster*** and ***report card***.

Note: Ensure all required fields in the "**name**" sheet are completed accurately.

Step 2: Edit the "**setting**" Sheet

Use the "**setting**" sheet to update school information, including:

- Subjects
- Grade & Section
- Homeroom Teacher's Name
- Vice Director's Name
- School Name, Address, and Contact Details
- Academic Year and Telephone Number

These updates will reflect across:

- mlist
- roster1
- roster2
- card and other sheets.

Note: Ensure all edits in the "setting" sheet are accurate and complete.

Step 3: Fill the "mlist" Sheet

Enter students' marks for each Subject in both:

- FIRST SEMESTER
- SECOND SEMESTER

And add data for Students Conduct and Absenteeism in the provided column

Finally, the software will calculate and update:

- Total Marks
- Average Marks
- Rank

Note: Input student's marks carefully, as they directly affect the results across the "mlist," "roster1," "roster2," and report "card" sheets.

Step 4: Maintain the report "card" Sheet

The report "card" sheet is used to review individual student records.

Click the Roll Number on the right-hand side of the "Roll Number" column or click on the navigation button to navigate and to get the next student result and detail record in the report "card" sheet.

This action displays the corresponding student's detailed record in the database.

Note: Ensure accurate data entry at every step to maintain consistency and integrity across all sheets.

Simple User Guide

Getting Started

Setting Up:

Ensure the software is properly configured for your school (e.g., grade boundaries, semester settings) and double check the type of the subject given for the corresponding grade. Enter the name of the homeroom teacher assigned for the given class according to the page requirement as illustrated by Fig 1.

If it's your first time using the software, follow the setup instructions in "setting" section.

For instance, here I've input the grade and section as "11E" and the first homeroom teacher name as "Fekadu Wolde" and the second semester homeroom teacher as "Geme". These data are seen in the screenshot below and displays in every parts of the section.

Fig 1. "setting" sheet

Inputting Data

The primary data inputs required are students' name, gender age and their subject results. Follow these steps:

Open the "name**" Section**

Entering Students Name, Gender and Age:
Navigate to the top corner or the first roll number in the worksheet then enter Students' Name, Gender and Age in the space provided as shown by Fig 2.

In the "Name", "Gender" and "Age" columns, type the names, gender and age of all students in your class or grade level as shown in the figure below. Ensure correct spelling and avoid duplicate entries.

For example, the Name, Gender and Age of two sample students are filled in the "Name" sheet as seen by the screenshot below. The name of these students will automate by the software and displays in every part the section.

Fig 2. "name" sheet

The second data inputs required are students' subject result, students conduct and absenteeism. Follow these steps:

Open the Mark list "mlist**" Section**

Enter Subject Results, Students' Conduct and Absenteeism for the first and second semester:

For each student, enter their results for each subject, students' conduct and absenteeism in the corresponding columns as shown by Fig 3.

For instance, the names of the two sample students "Ayantu Lemi Daba" and "Mubarek Jemal Ahmed" appeared in the mark list (mlist) sheet. After carefully input the results of each subject of the two students, we need to fill their conducts (in letter) and absents (in number) in the space provided, as shown by the screenshot below.

Fig 3. "mlist" sheet

Use numerical values (e.g., 85 for a score out of 100) and leave blank if a result is not available.

Saving Data:

After entering all data, save your work to avoid data loss. Use the Save button or the standard save function in Excel.

Generating Reports

The software can generate various reports based on the entered data. After all the required data are carefully and correctly inputted, the homeroom teacher can easily access all the information used to report to the school management and record office. Here's the way how to access them.

Rosters for the First and Second Semester

Go to "roster1" sheets.

Review the first semester roster that contains students detail data. Each roster page contains five student with their first semester results of all the given subject and their conduct and absenteeism as shown in the Fig 4.

Here we find the first semester roster that contains the results of each subject, conducts, absenteeism and other data of the two students for their first semester academic activities and performance. The homeroom teacher can easily print this page and submit to the school record office within the schedule screened by the school.

Fig 4. "roster1" sheet

This sheet contains the students' first semester result of each subject, total mark, average mark, conduct, absenteeism and other information. It also contains homeroom teacher name. No data

input is required in this sheet it is resulted from the automation of the software. The homeroom teacher can easily access and print it to report for record office.

Go to "roster2" sheets.

Review and access the first and second semester results and other data in "roster2" sheet that contain the students' complete information within the two semesters. This can be illustrated for two sample students taken, in Fig 5 below.

Here, after completely feeding the required data the second semester roster will display as of the screenshot given below. The sheet contains the students' first and second semester result of each subject, cumulative mark, cumulative average mark, conduct and other important information.

Fig 5. "roster2" sheet

No data input is required in this sheet it is resulted from the automation of the software. The homeroom teacher can easily access and print it to report for record office.

Report Cards:

Go to the "card" section.

Select a student from the dropdown menu or input their roll number or click on the navigation button found in the sheet to view their detailed report, as shown in Fig 6.

This section shows the report card of the first student (Ayantu Lemi Daba) academic activities and performances based on the data we provide to the software.

Fig 6. "card" sheet

We can go to the next student's report card by clicking the navigation button. We can also go back and forth simply by clicking the navigation buttons to view the student we want.

Result Analysis:

Open the "anlys1**" and "**anlys2**" section**.

Navigate to the "**anlys1**" section to observe and print the first semester result analysis, similarly navigate to the "**anlys2**" section access the second semester result analysis.
View the summary of student performance, including total scores and averages in the first and second semester.

Fig 7. Result analysis section

Subject Analysis:

Open the "anlys1**" and "**anlys2**" section**.

Go to the "Subject Analysis" part.

Open "**anlys1**" the First Semester Result Analysis and "**anlys2**" the Second Semester Result Analysis sheets and choose the subject and semester to view performance trends, as illustrated in Fig 8 below.

First Semester Subject Result Analysis

11E	ATEND ON EXAM			Mark less than 50%			Mark greater than or equal to 50%

Troubleshooting Common Issues

Here are some common issues you might encounter and how to resolve them:

Incorrect Data Entry:

Double-check the student names and results for accuracy. You can easily edit any data to correct mistakes.

Missing Results:

Ensure all required fields are filled correctly.

Terms and Abbreviations

The software uses some terms and abbreviations for certain words and phrases to conserve space and enhance the readability of data displayed on the screen. The meanings of each terms and abbreviation I have used are illustrated below. In case you get stuck while working, you can refer to this section.

1. **drctn**: Directions, the direction sheet indicates how to use the software.
2. **setting**: In "setting" sheet we can input different data such as, grade, section, name of homeroom teacher & other data.
3. **name**: Students Name, this sheet includes students information, name, gender and age.
4. **mlist**: Mark List, in this sheet we need to input student mark of each subject, their conduct and their absenteeism.
5. **roster1**: Semester I Roster
6. **roster2**: Semester II Roster
7. **card**: Report card, this sheet generate report card for each students.
8. **anlys1**: Semester I Analysis, this sheet provides the first semester general result analysis, subject result analysis and a list of top ten student and their average results.
9. **anlys2**: Semester II Analysis, this sheet provides the second semester general result analysis, subject result analysis and a list of top ten student and their average results.
10. **sname**: Sample Name

Thank you for using my software!!

Your suggestions and questions are invaluable in helping me improve the program, and make it more user-friendly. Don't hesitate to call or send a message using the contact information below:
